With over 5 years of experience as an ESD Consultant, I bring a wealth of knowledge and expertise to each project I undertake. As the director of lorax + co, I am dedicated to delivering sustainable solutions for building design that meet the unique requirements of each project.

With a thorough understanding of the latest industry standards and regulations, I am able to provide high-quality and cost-effective solutions that meet the needs of each project. Whether working in the planning or building approval stages, I bring a comprehensive understanding of sustainable building design and am able to provide expert advice to ensure that my clients achieve their sustainability objectives.

As a sole trader, I am committed to providing personalized and professional service to each of my clients. I strive to establish positive working relationships with all stakeholders and am dedicated to delivering the best possible outcomes.

CORE CAPABILITIES

ENVIRONMENTALLY SUSTAINABLE DESIGN (ESD)

- A deep understanding of various council requirements, combined with extensive experience on BESS assessments and associated SDA/SMP reports, STORM assessments and associated WSUD reports, as well as the Green Star tool.
- A holistic approach taken to environmentally sustainable design, considering all elements of a building's impact on the environment, from energy and water use to materials selection, and further.

NCC COMPLIANCE

- Wealth of experience and knowledge in NatHERS star ratings to ensure that residences meet the latest building codes and regulations while achieving optimal energy efficiency and sustainability performance.
- Expertise in developing comprehensive and cost-effective DTS reports for commercial and industrial projects, streamlining the building approval process.

COLLABORATION AND FACILITATION

- Proven track record of facilitating the integration of ESD principles into building design amid conflicting stakeholder objectives
- Extensive experience collaborating with architects and planners to integrate a holistic approach to sustainable design
